KIDWRITER™

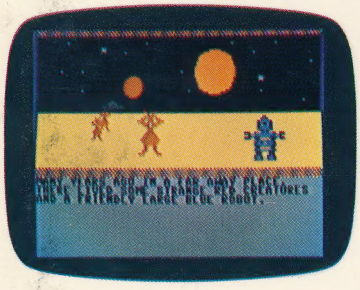
With KIDWRITER your children can create their very own storybook. They'll make colorful scenes, then write a storyline to go with them. There's even music, too!

KIDWRITER's unique format lets kids choose their own story and picture settings, from a farm to a theater to outer space. And with a choice of 99 different characters and objects, your child can make pictures of almost anything.



Best of all, while it encourages children to create word and picture stories, it introduces them to the fundamentals of word processing. It even lets them make stories that continue from one "page" to another.

Children will love KIDWRITER–because it's as versatile and exciting as their own imaginations!

Jim and **Jack Pejsa,** creators of KIDWRITER, are two brothers who specialize in software that is interactive, easy to use and encourages creativity in children.

Educational Value: KIDWRITER provides an original format for story writing and illustration. It encourages creativity while introducing children to the fundamentals of word processing.
Ages: 6–10

A Message to Parents

KIDWRITER is a software package that allows a child to easily create a colorful picture and write a story related to the picture, just like a page out of a storybook. Picture-story "pages" may be linked together to create a storybook of many pages. The picture-stories can be saved on disk and loaded again at a later time.

Great care has been taken to insure that KIDWRITER is easy for children to use with minimal or no supervision. The unique program design encourages the grade school-age child to express his or her creativity through words and pictures. We feel KIDWRITER will work well in the home and in the school for encouraging creative writing and design, and for just plain fun.

Jim and Jack Pejsa

LOADING THE PROGRAM

Important: If you intend to print your picture-story, the printer must be attached to your computer *before* loading the KIDWRITER disk.

Commodore 64™:

1. Turn on your disk drive, computer and tv or monitor. Place Kidwriter in drive and close drive door. ***Note:*** *When using a Commodore 128, the Commodore Key must be depressed while turning on the computer.*
2. Type **LOAD"SPIN",8** and press **RETURN**. At READY prompt, type **RUN** and press **RETURN**. The program will load automatically.

   Kidwriter is only guaranteed compatible with the printers listed below:
   Black & White Only
   Commodore 1525, Commodore MPS 801 and MPS 803, Okimate 10

Atari™:

1. Make sure computer is turned off. If you are using the 800XL or 1200XL, put the Basic Computing Language Cartridge into your computer.
2. Turn on disk drive then insert Kidwriter disk when the red light goes out.
3. Turn on the monitor/TV and computer. Program will load automatically.

Apple®:

1. Put the Kidwriter disk in the drive and close drive door. Turn on the monitor and the computer. Program will load automatically.
   Note: To run Kidwriter on the Apple IIe, depress the **CAPS/LOC** key.

   Kidwriter is only guaranteed compatible with the printers listed below:

Black & White Print
Apple Imagewriter
Apple Imagewriter II
Apple Scribe
Epson FX Series
Epson JX Series
Epson RX Series
Epson MX Series
(with Graftrax-Plus)
Okimate 20

Color Print
Apple Imagewriter, Apple Scribe
Epson JX-80, Okimate 20

Compatible Printer Cards
Apple Super Serial Card
Apple Parallel Card
Apple IIc Printer Port
Epson APL Card
Grappler Card, Grappler-Plus Card

IBM®:

1. Put the DOS disk into the drive and close drive door.
2. Turn on the monitor and the computer. At the **A>**, remove the DOS disk from the drive and put the Kidwriter disk into the drive and close the door.
3. Type **KDW** and press **RETURN**.

   Kidwriter is guaranteed compatible on the IBM PC, PCjr only with printers listed below:
   Black & White Only
   Epson Brand, IBM-Brand Graphics Printers (Except the IBM ProPrinter)

Note: Do *not* install Kidwriter onto a hard disk. It is copyprotected and therefore may cause damage to the program *and* your hard disk.

GETTING STARTED

When the program begins, the main menu will be displayed and you can choose one of the following options:

(M)ake a new picture-story (press the [M] key)
(L)oad an old picture-story (press the [L] key)
(D)irectory of picture-stories (press the [D] key)
(Q)uit for now (press the [Q] key)

(M)AKE A NEW PICTURE STORY

Creating the Picture:

Press [M] to make a new picture-story. The menu that now appears on the screen allows you to change the background scene, look at different objects, choose an object, erase the picture or begin writing your story.

After you have chosen a scene and the object you want, another menu will be displayed. This menu allows you to change the color and size of the object, and to move the object around the screen. When you are finished making your picture, press [D] to indicate that you are done.

Objects:

A picture is created using objects chosen from a pre-stored library. The objects can be moved around on the screen, and their size and color may be changed with a keystroke. When you have placed the maximum number of objects in the screen a message will appear instructing you to press [D] for done. Ninety-nine objects are available including pictures of people, animals trees, buildings, spaceships, toys, letters and numbers. A list of the objects available can be found at the end of this manual.

Writing the Story - The Wordprocessor:

The lower part of the screen is the area where you will write your story using the wordprocessor. The wordprocessor program turns your computer into a powerful electronic typewriter. The wordprocessor has many features that allow you to correct typing errors, erase and retype parts of the story, and insert new parts into the story. The keys used to change or edit your story are described in the next section.

As you type in your story and get near the end of a line, just keep typing. If a word won't fit on the line, the wordprocessor will put it on the next line for you.

Editing Keys:

Several keys are used to change or edit what you have typed.

Command	Function	Apple II/II+	Apple IIe/c	C64/128	IBM	Atari
Cursor Down	Moves the cursor down one line.	[CTR] [X]	↓	CRSR	↓	[CTRL] ↓
Cursor Up	Moves the cursor up one line.	[CTR] [E]	↑	SHIFT CRSR	↑	[CTRL] ↑
Cursor Right	Moves the cursor right one space.	[CTR] [D]	→	CRSR	→	[CTRL] →
Cursor Left	Moves the cursor left one space.	[CTR] [S]	←	SHIFT CRSR	←	[CTRL] ←

Command	Function	Apple II/II+	Apple IIe/c	C64/128	IBM	Atari
Delete	Erases letter under cursor and moves letters behind cursor one space to the left. Repeat or hold down to erase words or even whole sentences.	[ESC]	[ESC] or [DEL]	[INST DEL]	[DEL]	[DEL]/ Backspace
Home	Moves cursor to the upper left corner of the writing area.	[CTR] [B]	[CTR] [B]	[CLR]	[CTR] [B]	[ESC]
Clear	Erases everything in the story area.	[CTR] [N]	[CTR] [N]	SHIFT [CLR]	[CTR] [N]	[CLEAR]

To insert letters or words into the middle of your story, move the cursor to the place where you want to insert and begin typing. The words that follow will automatically move to the right as you type. Try erasing the screen and typing in a story. Practice using all of the editing keys until you know how to use them well.

Saving the Picture-Story on Disk:

When you have finished typing your story, press the [*] key on the Atari, Commodore and IBM, and the **SHIFT**[*] key on the Apple to indicate that the picture story has been completed. A new menu will appear which allows you to save your picture-story on disk. Press [Y] to save your picture-story. Follow the screen instructions to name your story.

After your picture-story has been saved, a new menu will appear. The program allows you to create a story having several 'pages', just like a storybook. If you want more than one page in your story, press [Y] for yes. The program will start over again to make the next page.

(L)OAD AN OLD PICTURE-STORY

Press [L] to load a picture-story you have previously stored on disk. Then type the name of your picture-story. After a few seconds the picture-story will be displayed on the screen.

(D)IRECTORY OF PICTURE-STORIES

Press [**D**] to see or to erase stories you have stored. A new menu will appear that will allow you to:

Press [**S**] to see a list of stories you have stored
Press [**E**] to erase a story you have stored
Press [**B**] to go back to the main menu

PRINTING A PICTURE STORY

Before Printing your Picture-Story (Apple users only)

If you intend to print your story, attach the printer to your computer prior to loading Kidwriter. For Apple II, II+, and IIe users, this will also mean inserting a printer card into one of the available slots.

The very first time you use the printing option, you will have to choose the printer, printer card and slot. Press [**P**] on the Main Menu. This will display the Printer Menu.

To choose a Printer, press [**C**] and then select a printer from the choices listed on the screen. After the stand-by message disappears, press [**B**] to go back to the Printer Menu. In the same way, press [**S**] to select a printer card, and press [**A**] to assign a slot number. **Please note**: Apple IIc owners must always assign slot #1. Assigning any other slot will will result in an error message when you try to print.

You do not need to set these options again unless you use a different printer or card, change your card's slot, or want to alternate between black and white or color printing.

To Print Your Picture-Story (Apple, IBM, C64)

1. To print an old story, press [**P**] on the Main Menu. After pressing [**P**], follow the printing instructions on the screen.
2. To print a story you have just completed, first save it by following the instructions for SAVING THE PICTURE-STORY ON DISK.
3. Press [**P**] on the Main Menu to print your new picture-story.
4. Type the name of your story using less than 7 letters (12 for Apple).
5. Press **RETURN** and your story will be printed.

Note: If you are using a black and white printer, make sure to select colors for the objects that will contrast with the color of the background. Or choose a background color that will contrast with the color you have chosen for the objects.

Printing is only available for IBM (black and white only), Apple, and Commodore 64/128 users. Atari and Tandy versions of Kidwriter do not contain a Print option.

SPINNAKER®

Meet our family of home computer and video software—Spinnaker Software Corp.

Designed to meet the different needs and interests of everyone in your family, Spinnaker Software products offer some of the leading computer software and video titles available in the educational, entertainment and home productivity areas.

Take computer software: For starters there's the SPINNAKER® line. From pre-school counting to high-school compositions, Spinnaker offers high quality, award winning, educational programs you've come to expect.

And with our FISHER-PRICE™ Learning Software, children can develop key learning skills in areas such as math and reading while having fun at the same time.

For adventure fans, try our TELARIUM™ and WINDHAM CLASSICS™ software products. These two graphics and text interactive adventure brands are based on best-selling science fiction and mystery books and well-known classic novels. Our entertainment offerings also include UXB, our new line of action games.

And if you're looking for powerful, easy-to-use and affordable home productivity software, there's BETTER WORKING™ from Spinnaker.

We also offer a new line of video tape products: The SPINNAKER® VIDEO series, including the Spinnaker workbooks, are engaging visual experiences that teach children fundamental learning skills like reading and math.

And the CAPTAIN KANGAROO video programs develop important life skills and social values for young children.

Our Sports Videos feature instruction by leading golf and tennis professionals. Also available are Space Videos that offer exciting footage of the landing on the moon and space shuttle missions.

Our latest video releases include two SAT Videos that feature a Math and Verbal review and practice. These products are guaranteed to increase your score. We also have two exciting interactive Mystery Videos in which you and your family try to solve a murder by uncovering evidence and finding clues.

So, when your family is looking for computer and video software, take a look through the pages of this catalog and meet the Spinnaker Software family of computer and video products.

To order—

All of the products in this catalog can be found at most software and video stores in your area. But if you can't find a program you want, use the enclosed order form or you may place your credit card order by phone: 1-800-826-0706, Illinois residents call 1-800-826-1330.

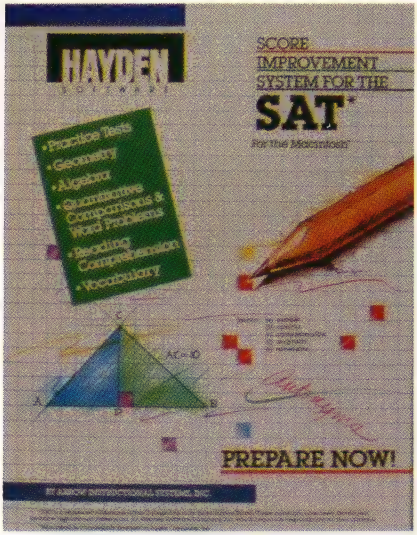
OFFICIAL PBS SPONSOR OF THE 1986 WORLD CHESS CHAMPIONSHIPS!

from Spinnaker,

HAYDEN SCORE IMPROVEMENT SYSTEM FOR THE SAT™



HAYDEN SCORE IMPROVEMENT SYSTEM FOR THE SAT™

A comprehensive computer-aided preparation for the SAT developed and tested in schools across the country. Includes complete Math module, Verbal module and Practice Exams module. Subject areas range from algebraic and geometric problems, to reading comprehension and vocabulary. All material is displayed on screen; there is not need to refer to a manual or text. A tutorial section explains each answer and the best way to arrive at it. Simulated tests scored on the 800 scale indicate how you would have done on the actual exams. A must for all students preparing for the SAT.

APPLE II+, IIe, IIc	17009	$39.95
APPLE MACINTOSH	17034	$99.95

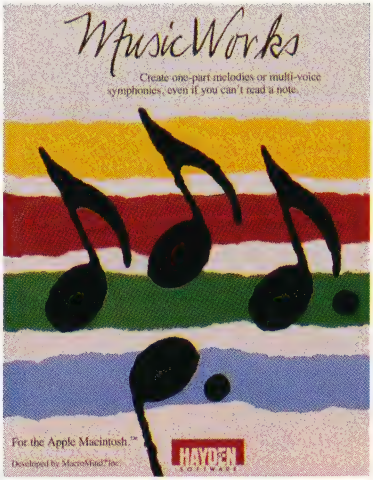
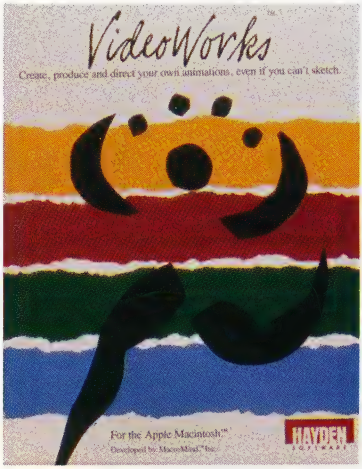
MusicWorks from Spinnaker, and VideoWorks





MUSICWORKS™

Create, edit, and listen to musical compositions—everything from the simplest childhood melodies to fully-orchestrated symphonies. Features eight instruments playable in up to four voices.

APPLE MACINTOSH 31834 $49.95

VIDEOWORKS™

Perfect for any age or skill, Videoworks is a full-featured animation program for presentations, training, storyboards, movies, or cartoons. Create high-quality animations with its system of tools, artwork, tutorials, and examples.

APPLE MACINTOSH 35534 $99.95

ALSO AVAILABLE:

"I KNOW IT'S HERE SOMEWHERE!"™

A personal filing system which puts all your information such as addresses, lists, credit card information, etc. at your fingertips. Create your own customized form layout. Includes sort, search and print options.

APPLE MACINTOSH 32134 $29.95

HAYDEN: SPELLER™

A spelling verification system. Contains 97% of the most-used words in the English language and an add your own "personal dictionary" feature. Compatible with MacWrite and Microsoft Word documents.

APPLE MACINTOSH 20034 $39.95

M.U.D. (MACROMIND UTILITY DISK)

A utility disk designed to enhance and speed your creativity with almost any Macintosh application. Included on the disk are: CheapPaint, an art program; and Art Grabber +, a program which transfers artwork quickly between documents; and various features from MusicWorks and VideoWorks.

APPLE MACINTOSH 36734 $49.95

from Spinnaker,
da Vinci Series

The *da Vinci* architectural design series is a system of MacPaint™ documents containing images drawn to scale by professional artists and architects. Whether you're an architect by trade or an amateur designing your "dreamhouse," the *da Vinci* modules have been laid out and presented in a way which will give your plans and slides truly professional quality.

COMMERCIAL INTERIORS™
An easy-to-use tool for effective space planning in a business environment. Contains scaled images of everything you need to set up floor plans for restaurants, offices, theaters, etc., from desks and chairs, files, lunch room equipment, modular partitions and wall units, to even personal computers and wordprocessors.

APPLE MACINTOSH 31434 $199.95

HOME DESIGN™
For anyone—professional or amateur—with a Macintosh and an apartment, house, or summer cottage, Home Design is an indispensable planning tool. It offers carefully drawn and scaled three-dimensional images for "hands-on" exploration of your design idea in an easy-to-visualize format. This 2 disk product contains over 800 beautifully rendered drawings of furniture, equipment, and various household accessories. Compatible with MacPaint and MacDraw.

APPLE MACINTOSH 35734 $79.95

BUILDING BLOCKS™
Based on the childhood concept of stackable toy blocks, this unique module is a very effective computer-aided imaging and design tool. A precise system of detailed interchangeable units have been created which draw from a variety of architectural design and landscaping examples. With over 400 "blocks" to choose from, the potential for creativity and originality in your design is limited only by your imagination.

APPLE MACINTOSH 32334 $79.95
